Subject: RE: [modeling comments] Checking in on Status of WY RH FR notice and record prep

Hi All,

Almost all of the remaining comments in the modeling section need a legal, policy or emissions response. There are also some duplicate comments that should probably be deleted, and some old comments that may no longer be relevant. I summarized some of the remaining comments below. Do you want to get together to discuss possible responses to these comments?

Thanks,

Gail

P27 calpuff uncertain at tenths or hundredths of a dv

P36-37, cumulative impacts at multiple class I areas, 3 comments

P48 ... EPA's acceptance of a 0.07 lb/MMBtu or higher SCR controlled emission rate in other state

P54 Aaron - Need more info on SO2 emissions, how do allowable vs actual vs max SO2 emissions compare?

P58 I added a response to comment on summer nitrate

P63-64 These two comments are being moved to the BART section.

P65 comment on cumulative impacts, and CAA requirement to “eliminate any visibility impact from BART sources” – move this to P36?

PP65-70 Two more comments on cumulative impacts. Move to P36?

P70 comment on baseline emission no longer relevant. Delete?

Thanks Gail.

It looks like there are about 40 comments that still need responses.

If you all can let us know the following:

(1) which ones you are asking ORC to draft (I have tagged the 20 that don't have a office indicated for the lead with a notation); and

(2) when the rest will be available for our office to review.

Thanks

Subject: RE: Checking in on Status of WY RH FR notice and record prep

Hi All,

On the modeling section, per my email last Friday, I have a draft response to most of the comments, and I added comment bubbles on the ones I think need primarily a policy, emissions of legal response.

Thanks,

Gail

Hi All – To keep track of where are office is at in reviewing and drafting I just put together the following table.

And wanted to check in on the status of the various sections, in particular would appreciate updates on the sections marked in yellow.

We are happy to let OGC know when various sections are ready for their review.

Many thanks,

Sara

Section (plan was to have these ready for ORC review 11/8/13)	ORC notes 11/15/13	Draft to Carl 12/3	Date ORC forwards note to OGC that ready for review in max.gov (no later than 12/4)	OGC comments completed (no later than 12/13) [also forward to OAQPS/Callie]	Region response to OGC comments and notifies that for next level review (12/2)
Intro	Elyana done with review				
Legal	Sara is 99% done, with the exception of a couple comments OGC is drafting responses to that have national implications.				
BART1	There are notes for Aaron & Laurel to follow-up on. Sara done with first review (11/14/13),		[also forward to OAQPS/Callie]		

	waiting to review response to questions asked
BART2	Is this section ready to edit? We assume so, and Sara is beginning her review 11/15/13
RP	Steve is 98% done, he has one question left to do
Modeling	We hadn't heard this one was ready for review, but Steve has gone ahead and begun review.

	We note that our initial assessment found this section still has 40+ comments that are unanswered, most without notes on who/how these will be answered. What are the Program plans, and when do you think we can expect a complete draft to review?
General	Where are we at in this one? Need anything else from us?
Statutory and reg text Docket	Elyana and Sara done with initial review
